Neighbrick

Pledge and payout journeys. Product Designer take-home for Hikari Infotech.

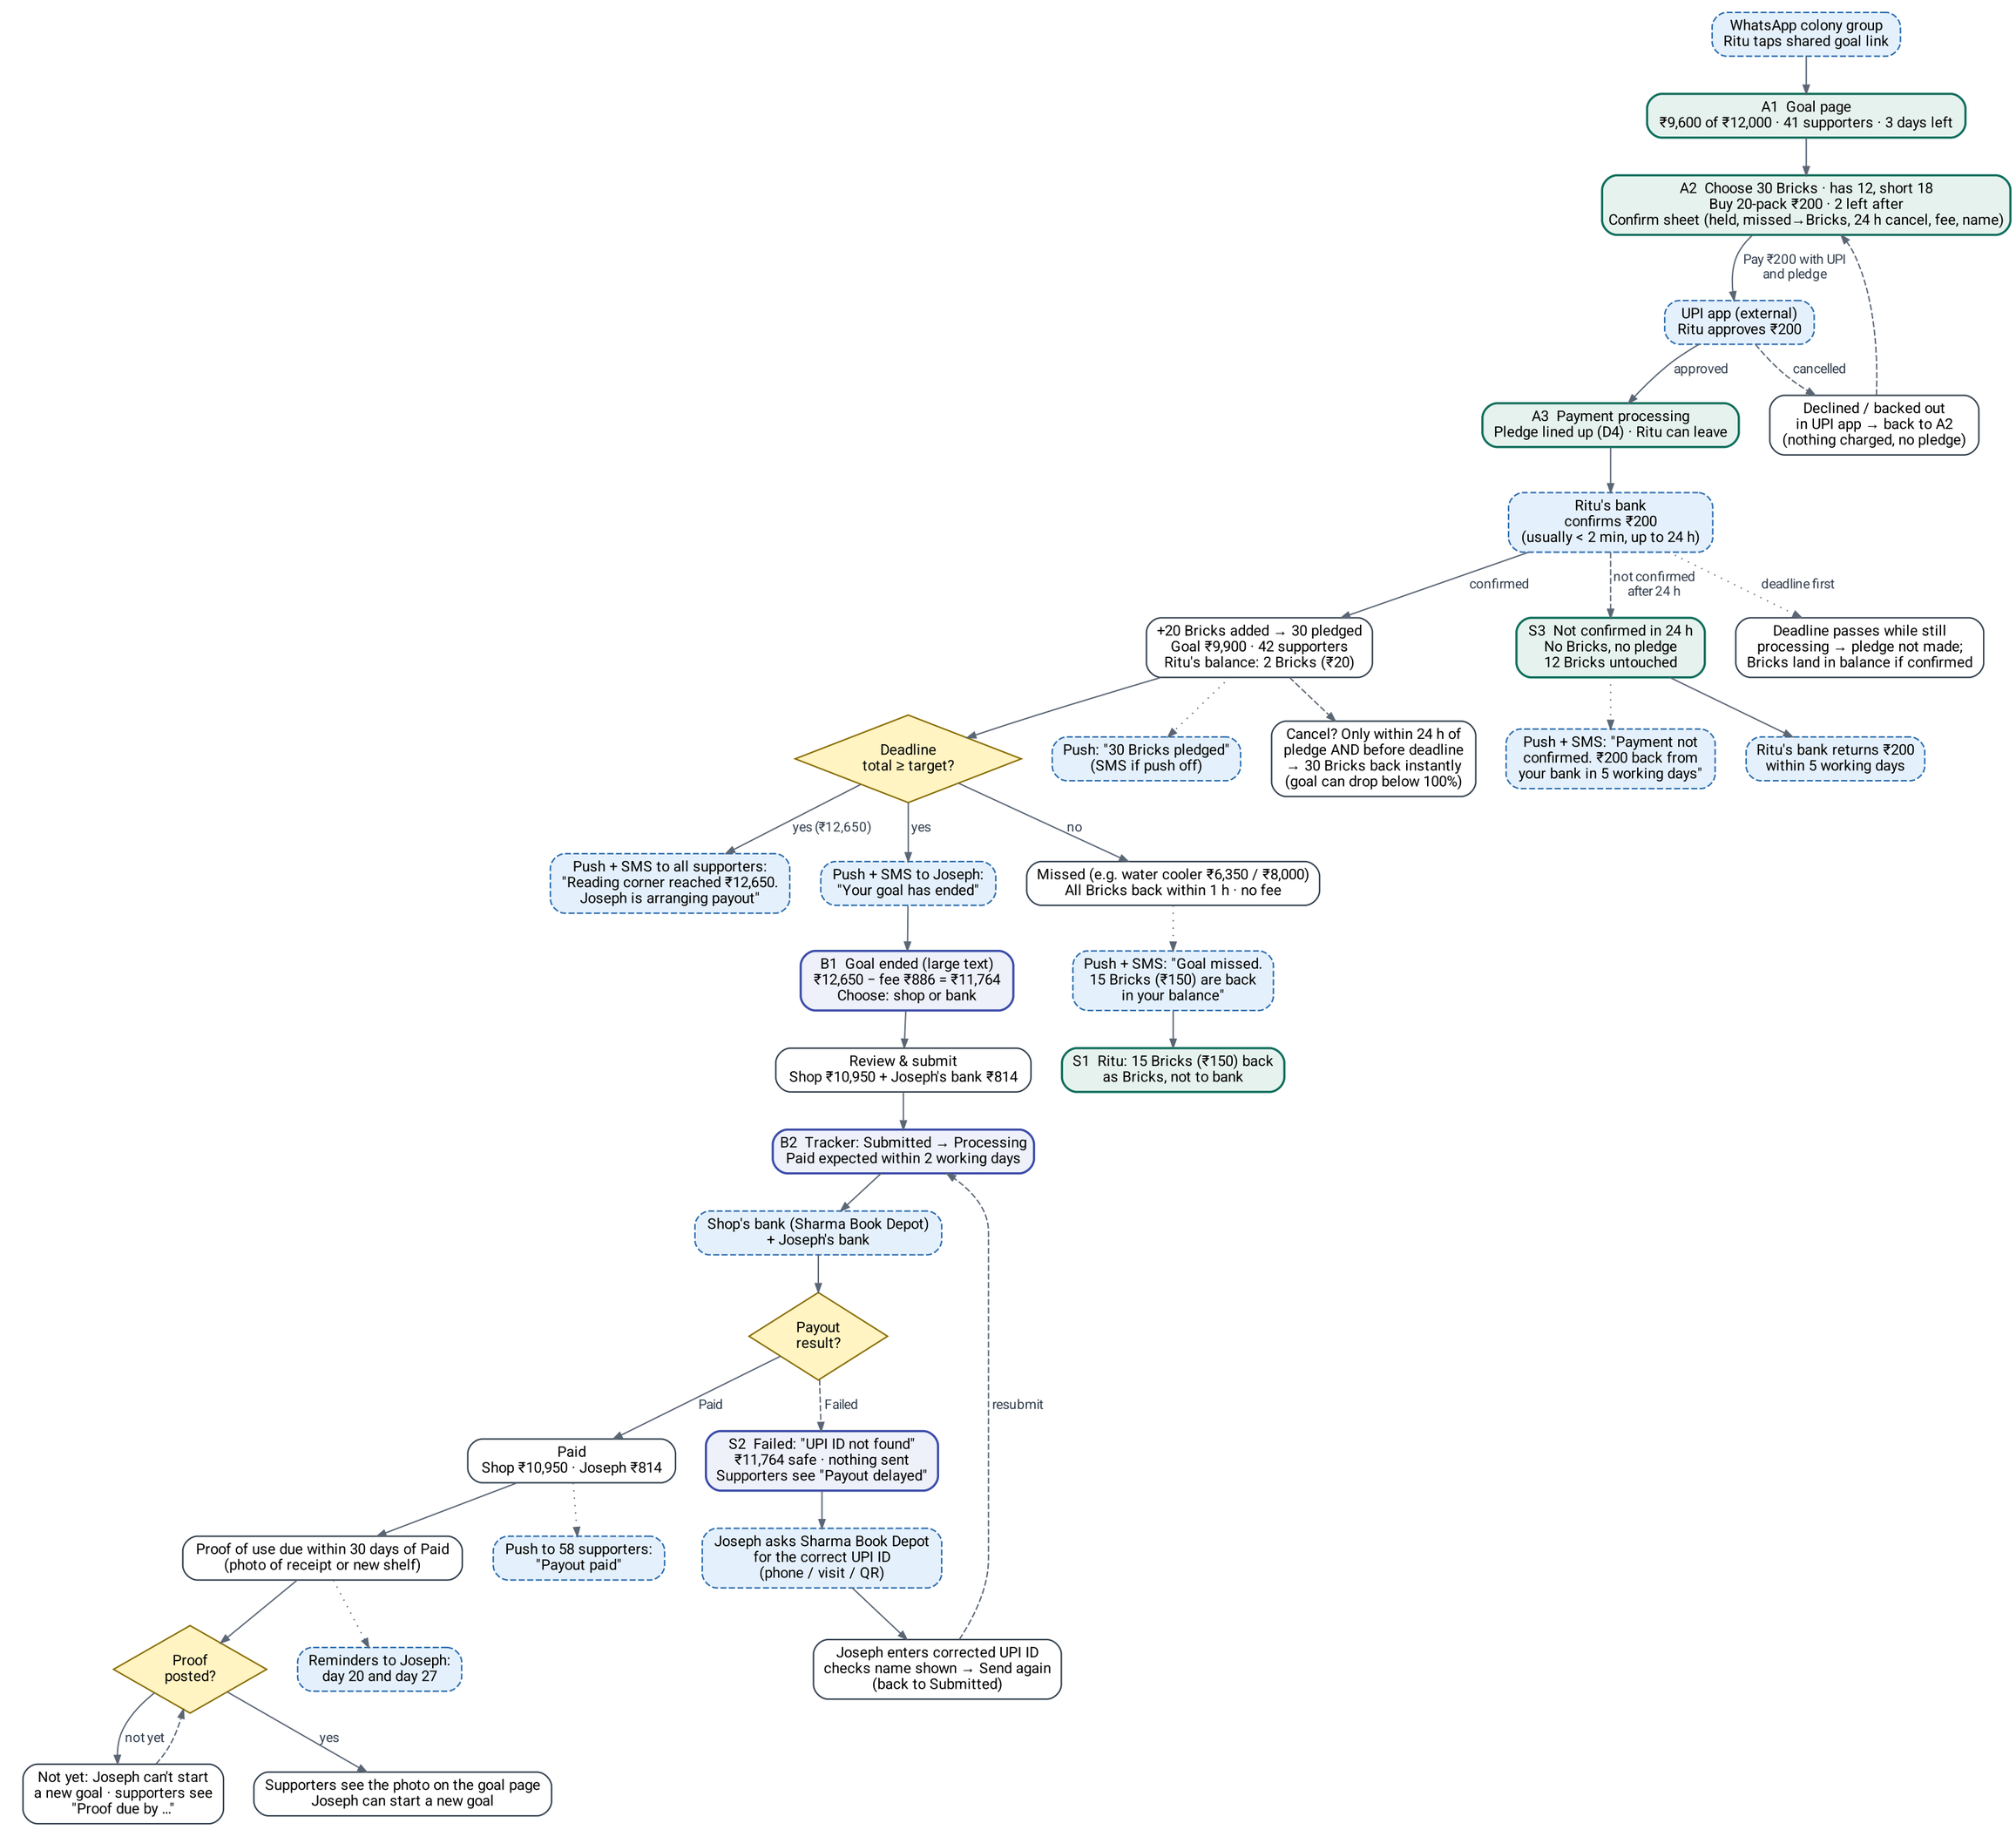

Candidate: Ayusi Parida

Android, frames at 360 dp wide; taller frames mark the 800 dp fold. Joseph's frames (B1, B2, S2) use body text of 20 or more and tap targets of 48 × 48 or more.

A. Flow diagram · B. Eight frames · C. States inventory · D. Written section · E. Process note

A Combined journey flow

Journey A (Ritu, green) feeds Journey B (Joseph, blue). The confirm step comes before the UPI hand-off because of D4.

B Eight frames

Five high-fidelity screens and three states. Yellow notes name the decision each frame reflects.

Journey A numbers

Needs 30 Bricks, has 12, short **18**.
10-pack is too small; **20-pack, ₹200** is the smallest that covers it.
12 + 20 − 30 = **2 Bricks (₹20) left**.
Goal after pledge: ₹9,600 + ₹300 = ₹9,900, 42 supporters.

Journey B numbers

7% of ₹12,650 = ₹885.50 → exactly 50 paise rounds up → **fee ₹886**.
₹12,650 − ₹886 = **₹11,764 available**.
Shop gets invoice **₹10,950**; remainder ₹11,764 − ₹10,950 = **₹814** to Joseph's bank.

States numbers

Water cooler: ₹6,350 of ₹8,000 (79%) → missed, no fee.
Ritu gets back **15 Bricks (₹150)** as Bricks.
Her balance: 2 (left after Journey A) + 15 = **17 Bricks (₹170)**.

Journey A: Ritu pledges to the reading corner

Mon 7 Dec 2026, from the colony WhatsApp group

A1 Goal page, arriving from WhatsApp

7:40

Goal

Lakeview Colony, Pune

Books and a shelf for the Lakeview Colony reading corner

JD **Organised by Joseph D'Souza**
Runs the colony reading corner

₹9,600 raised of ₹12,000

80% · ₹2,400 to go

41 supporters
3 days left
Ends Thu 10 Dec, 9:00 pm

The goal is confirmed only at the deadline, because pledges can be cancelled for 24 hours.

If the goal is missed
If it ends below ₹12,000, every pledge comes back as Bricks to each supporter's Neighbrick balance within 1 hour. Not to bank accounts. No fee is taken.

41 supporters

Anjali M. · Deepak R. · Farida S. · Gopal N. · Kavita P. · and 30 more

6 supporters chose to appear as "A neighbour". Names are listed A to Z. Amounts are never shown.

How your money is protected

- Neighbrick holds every pledge until the deadline. Joseph can't use it before then.
- After he is paid, Joseph must post a photo of the receipt or the result within 30 days.
- If the goal succeeds, Neighbrick keeps 7% of the final total. Supporters pay nothing extra.
- Every pledge and payout is written in a public receipt book that anyone can check. It shows amounts and times, never names or phone numbers.

See this goal's receipt book

D1: rupees lead
Target, progress and the fee are in rupees. Bricks appear only on her balance, paired with rupees: "12 Bricks (₹120)".

D2: not "reached" until the deadline
At 80% the page says when the goal is confirmed and why. Above 100% it would say "Target passed, confirmed at the deadline".

Visibility decision
Names without amounts, A to Z with no times, so names can't be matched to receipt-book timestamps. The receipt book is first met here, in plain words, under protection.

A2 Choose amount

7:40

Pledge to the reading corner

How many Bricks?

− **30** Bricks ₹300 +

10 (₹100) · 20 (₹200) · 30 (₹300) · 50 (₹500)

1 Brick = ₹10. Pledge 2 to 100 Bricks to this goal.

You have 12 Bricks. You need 18 more.
Add a pack below. Buying Bricks has no fee.

Add a pack

10 Bricks — Not enough: you'd still be 8 short — ₹100

20 Bricks — Smallest that covers it — 2 Bricks (₹20) left after pledging — ₹200

50 Bricks — 32 Bricks (₹320) left after pledging — ₹500

Bricks can only be pledged to goals. They can't be sent to others or turned back into money.

Your pledge	**30 Bricks (₹300)**
From your balance	**12 Bricks (₹120)**
Buy now with UPI	**20 Bricks (₹200)**
Left after pledging	**2 Bricks (₹20)**

Before you pay

- Held by Neighbrick until the deadline, Thu 10 Dec, 9:00 pm. Joseph can't use it before then.
- **If the goal misses ₹12,000,** your 30 Bricks (₹300) come back to your Neighbrick balance within 1 hour, as Bricks, not to your bank. You can pledge them to another goal.
- You can cancel for 24 hours after your pledge goes through, but never after the deadline.
- If the goal succeeds, Neighbrick keeps 7% of the final total. You pay nothing extra.

Show my name as "Ritu K." [on]
Neighbours see your name on the supporter list, never your amount. Switch off to appear as "A neighbour". You can change this later.

800 dp fold

The public receipt book records ₹300 against a random code, never your name or phone number.

Your UPI app opens to approve ₹200. The pledge goes through when the Bricks arrive.

Pay ₹200 with UPI and pledge

Pack choice
We preselect the smallest pack that covers the 18-Brick shortfall: the 20-pack. 2 Bricks are left, exactly the minimum pledge, so they stay usable.

Q2 and Q3 before commitment
Bricks-back rule and the 7% fee sit above the pay button, on the same sheet as the ₹200 purchase. Nothing is learnt afterwards.

Visibility, D4 and button placement
Name choice comes before paying. The pay button sits after every consequence, not pinned over them. One confirm covers purchase and pledge, so nothing is left to do after the UPI app.

A3 Brick purchase processing

360 × 920 dp, scrolls

7:41

Payment status

Payment processing

Your bank is confirming ₹200 for 20 Bricks. This usually takes under 2 minutes.

- **Approved in your UPI app** Done — 7:41 pm
- **Bank confirming ₹200** Waiting
- **20 Bricks added** Next
- **30 Bricks (₹300) pledged** Next — to the reading corner

Your pledge is lined up. It goes through by itself when the Bricks arrive, and we'll send you a notification. You can close this screen. Your 12 Bricks are set aside for this pledge.

If your bank is slow
It can take up to 24 hours. If it isn't confirmed by Tue 8 Dec, 7:41 pm: no Bricks are added, the pledge isn't made, your 12 Bricks are freed, and your bank returns the ₹200 within 5 working days.
UPI reference 4183 2290 7765

800 dp fold

Back to the goal

Get help

D4: pledge lined up
She doesn't wait. Nothing counts toward the goal until Bricks arrive, so a failed purchase never inflates progress or needs undoing. The 24-hour cancel clock starts when the pledge goes through.

Q4: riskiest moment
Money has left her bank but no Bricks show. The screen says what's done, what's waiting, the time limit and the refund, with her UPI reference.

Inset: the same screen at 7:42 pm, after "Bricks added"

Pledge done: 30 Bricks (₹300)
20 Bricks added.
Balance: 2 Bricks (₹20).
Cancel until Tue 8 Dec, 7:42 pm.
Reading corner: ₹9,900 of ₹12,000, 42 supporters.

Journey B: Joseph receives the money Large text, body 20 and up, tap targets 48 × 48 and up. Fri 11 Dec 2026

10:10

← Goal ended

✓ **Target reached**

Books and a shelf for the reading corner
Ended Thu 10 Dec, 9:00 pm. 58 supporters.

The money

Raised	₹12,650
Neighbrick fee (7%)	− ₹886
Available for the reading corner	**₹11,764**

7% of ₹12,650 is ₹885.50. Half a rupee rounds up, so the fee is ₹886.

Where should the money go?

Either way, it arrives within 2 working days.

◉ **Pay the shop for me**
Sharma Book Depot gets **₹10,950**, the invoice amount. The other ₹814 goes to your bank account ending 4417.
Supporters see the shop's name and invoice.

800 dp fold

○ **To my bank account**
All ₹11,764 goes to your bank account ending 4417.
Supporters see it was paid to you.

Review payout

You'll check every detail before anything is sent.

Q3: fee shown with its working
Joseph sees the 50-paise rounding spelled out, so he can explain the ₹886 to neighbours and nobody thinks he kept it.

Each route says where every rupee goes
₹10,950 to the shop plus ₹814 to him adds up to ₹11,764 on screen. No route is preselected; this frame shows his choice.

Large text
Body 20, headings 22 to 34, radios and buttons 56 dp high. One decision per screen; submit happens on the next review screen.

✓ **Your 15 Bricks (₹150) are back in your balance**
Returned Sat 19 Dec, 6:24 pm. No fee was taken.

As we said when you pledged, Bricks from a missed goal come back as Bricks, not to your bank. You can pledge them to any goal.

Balance before	**2 Bricks (₹20)**
Returned	**+ 15 Bricks (₹150)**
Balance now	**17 Bricks (₹170)**

See goals in Lakeview Colony

Keep them for later

See this return in the receipt book

800 dp fold

Q2: the Bricks-back moment
Leads with her outcome in her terms, 15 Bricks worth ₹150, with the exact return time. "As we said when you pledged" restates a rule she saw on A1 and A2.

Neutral, not an error
A missed goal isn't her fault: return icon and grey bar, no red. Next steps instead of a dead end.

S2 Joseph: shop payment failed 360 × 1480 dp, scrolls

4:05

← Payout

Payment to the shop failed

Failed Reason: UPI ID not found

Your ₹11,764 is safe with Neighbrick. Nothing was sent, not to the shop and not to your bank.

What went wrong

The shop's UPI ID, sharmabookdepot@upi, doesn't exist. It may have a typing mistake, or the shop may use a different one.

How to fix it

1. Ask Sharma Book Depot for their UPI ID. It is often printed on their QR code.
2. Type it below. We'll show the name it belongs to, so you can check it before sending.
3. Send it again. The money arrives within 2 working days.

800 dp fold

Shop's UPI ID

for example, name@bank

Check UPI ID

Get help from Neighbrick

What supporters see meanwhile

"Payout delayed: the shop's payment details are being updated. The money is held safely by Neighbrick."

They aren't sent a notification about this. They are notified when it's paid.

Safety first, then the fix
Joseph's fear is getting details wrong, so "your money is safe" comes before any explanation. The steps are numbered because they are a sequence.

Check before resend
He sees the name linked to the new UPI ID before sending again, the same check people know from their UPI apps.

Supporters: honest, no blame
The goal page says "delayed" and that money is held. The technical reason stays with Joseph.

S3 Ritu: purchase not confirmed in 24 hours 360 × 800 dp

7:42

× Payment status

Your ₹200 payment wasn't confirmed

Your bank didn't confirm it within 24 hours, so:

- × No Bricks were added.
- × Your pledge of 30 Bricks wasn't made.
- **Your bank will return ₹200** to your account within 5 working days, by Tue 15 Dec.
- ✓ Your 12 Bricks (₹120) are free to use again.

The reading corner is still open
2 days left. Ends Thu 10 Dec, 9:00 pm

Pledge my 12 Bricks (₹120)

Try buying Bricks again

UPI reference 4183 2290 7765. If the ₹200 isn't back by Tue 15 Dec, contact your bank with this reference.

Why this state
It's the failure half of D4 and the end of the Q4 risk, so it proves the "lined up" promise on A3 was honest.

Four plain outcomes, one date
Bricks, pledge, refund and her own balance are each stated, with the refund date and the UPI reference she can give her bank.

C States inventory

20 states across both journeys. S marks the three designed as frames.

Pending

Brick purchase processing (2 min to 24 h), pledge lined up. Shown on A3.

Purchase still processing at the goal deadline. Pledge isn't made; if confirmed later, Bricks land in her balance.

Pledge inside its 24-hour cancel window, with "Cancel until …" time, ending early at the deadline.

Goal ended, Bricks being returned (up to 1 hour): "Your Bricks are on their way back".

Payout Submitted / Processing. Shown on B2.

Proof of use due: days left shown to Joseph and supporters; Joseph can't start a new goal.

Error

Purchase not confirmed after 24 hours; bank refund within 5 working days. S3

Ritu cancels or the payment is declined in the UPI app. Back on A2, nothing charged, no pledge.

Shop payout failed: "UPI ID not found". S2

Bank payout failed: "bank temporarily unavailable". Money safe; Joseph retries, no details to change.

No internet on the goal page or when returning from the UPI app: last known status shown with "Checking again when you're online".

Empty

Zero Bricks balance: A2 shows the full amount as a pack choice.

Goal with no supporters yet: "Be the first to pledge", no empty list.

Goal without an invoice: only "To my bank account" offered on B1.

Proof not posted yet (supporter view): "Joseph has until [date] to post proof".

Edge

Goal ended, Bricks returned (water cooler). S1

Goal past 100% before the deadline (D3): "Target passed, confirmed at the deadline" plus the extra-money line.

A cancellation drops the goal back below 100%: bar and wording update, no "reached" to take back (D2).

Near the 100-Brick cap: if she has already pledged 90, the stepper stops at 10 more and says why.

WhatsApp link opened after the goal has ended: result shown, pledge button removed.

D Written section

About 750 words. Limits: D1 to D4 under 40 words each; Q1 150, Q2 100, Q3 80, Q4 100, Q5 120.

Assumptions

1. Dates are illustrative: Journey A starts Mon 7 Dec 2026, 7:40 pm; the reading-corner deadline is Thu 10 Dec, 9:00 pm. Working days skip weekends and bank holidays.
2. Ritu pledged 15 Bricks to the water cooler before Journey A. After Journey A she holds 2 Bricks, so S1 shows 2 + 15 = 17 Bricks.
3. A shop payout is one payout: Neighbrick pays the shop first and sends the remainder only once the shop is paid, so a shop failure means nothing has moved.
4. Neighbrick can show the name registered to a UPI ID before sending, as UPI apps do.
5. While a lined-up pledge waits, Ritu's existing 12 Bricks are set aside for it.

Open decisions

D1. Both, rupees first. Targets, progress, fee and payouts are rupees only. Bricks appear where Bricks move (balance, packs, pledge), always paired: "30 Bricks (₹300)". Ritu thinks in rupees; Bricks are the bookkeeping.

D2. Only at the deadline. Before then, 100% or more reads "Target passed, confirmed at the deadline", with no celebration, because a cancellation within 24 hours can still pull it back below.

D3. A plain line above the pledge button: "Pledges above ₹12,000 also go to Joseph for this goal", followed by the organiser's note on what extra buys, if written. No redirect to other goals.

D4. Yes. One confirm lines the pledge up; it goes through when Bricks arrive and counts for nothing before. If unconfirmed in 24 hours or by the deadline: no pledge, her 12 Bricks freed, bank refunds ₹200.

Q1. The visibility decision

Neighbours see the supporter count and first names with an initial, listed A to Z with no times so they can't be matched to record timestamps. Amounts are never shown. On A2, "Show my name" is on and switchable to "A neighbour" before paying.

The public record stays quiet but findable, first met on A1 under "How your money is protected": "Every pledge and payout is written in a public receipt book that anyone can check. It shows amounts and times, never names or phone numbers." Link: "See this goal's receipt book". No "blockchain" in the main UI.

Losers: small givers who miss the default, and checkers like Mr. Rao, one tap deeper. Mitigation: the choice comes before paying and can be changed.

Relied on: 64% vs 45%, 38% hiding at ₹50 or less, 4% opens, 11 crypto questions. I'd switch to hidden-by-default if over 35% opt out.

Q2. Bricks back, not rupees

Before she pays anything: on A1's "If the goal is missed" box, then on A2's confirm sheet, beside the ₹200 purchase. That is when she can still choose less or nothing; learning it afterwards would repeat her "nobody knew where the money went" experience. S1 leads with her outcome in her terms, "15 Bricks (₹150) are back", the exact return time, "No fee was taken" and her new balance. "As we said when you pledged" restates the rule rather than revealing it, and the screen offers next steps and the receipt-book entry, not a dead end.

Q3. The fee

Both. Supporters see one line on A1 and again on A2's confirm sheet before paying: "If the goal succeeds, Neighbrick keeps 7% of the final total. You pay nothing extra." Joseph sees it on B1 before choosing a payout, with the working: ₹885.50 rounds up to ₹886. Showing it before commitment avoids a surprise deduction, and the exact figure lets Joseph tell neighbours where the ₹886 went.

Q4. The riskiest moment

Returning from the UPI app to "processing": ₹200 has left Ritu's bank and no Bricks show, echoing her last collection. Response: she confirms everything before the hand-off, so nothing is left to do; A3 shows what's done and waiting, the 24-hour rule, the refund and her UPI reference; push and SMS when it resolves; S3 keeps those promises. Not reduced: we can't speed up a slow bank, a failed purchase still takes up to 5 working days to refund, and a long delay near the deadline can cost her the pledge.

Q5. Keep up to three

Keep 3, photo updates: answers "where did the money go?" (29% of support messages) before proof is due.

Keep 4, deadline reminder: all-or-nothing makes the last day decisive; only people who opened the goal.

Keep 5, Hindi and Marathi: Pune colonies include neighbours less at ease in English.

- 1 can wait: shows who gave next door; 38% of small givers already hide names.
- 2 can wait: needs moderation, and neighbour disputes would play out in public.
- 6 can wait: changes totals, fee and payout maths, and needs association agreements.
- 7 can wait: doesn't fit fixed goals with deadlines and all-or-nothing returns.
- 8 can wait: only 4% opened the record, and the word "verified" invites the crypto question.

E Process note

150 words or fewer. Highlighted parts are for the candidate to complete truthfully before submitting.

Time: [about X hours, your honest total] .
AI tools: Claude (Anthropic) drafted the requirements checklist, the calculations, first versions of D1–D4 and Q1–Q5, the flow diagram (Graphviz) and all eight frames as HTML/CSS. [Add any other tools you used.]
Started from AI output: all frames and first drafts of the written answers. [Say which you rewrote yourself.]
Changed, rejected or verified: [One real example, e.g. you recalculated 7% of ₹12,650 = ₹885.50 → ₹886 by hand, or rewrote a copy line, and why.]
Unfinished: this is HTML, not a Figma file; no clickable prototype, proof-of-use posting screen, Mr. Rao's record view or Hindi/Marathi screen. [Add anything else.]
